BUILDING COMMITTEE ANNUAL REPORT FOR 2016

January 16, 2017

The year 2016 saw the completion of projects dreamed of for many years. The most exciting and demanding one was the installation of a long awaited elevator that now makes the entire building accessible for all our patrons. Working closely with architects and engineers and skilled contractors The Building Committee oversaw the project from inception to the first ride up to the auditorium.

To make the theatre venue even more accommodating, an ADA approved restroom was completed and functioning. We now have power and plumbing facilities to the service area at the rear of the auditorium to support the intermission snack program.

All the painting and millwork staining was done by members of the society saving over \$4,000 from the elevator contract.

Auditorium lighting was rewired to provide house light control from the head of both stairways and new power outlets for the east half to the second floor.

New ADA access was built connecting the art/music room to the main lobby.

A small office was constructed behind the ticket area.

The building committee would like to thank everyone for their support and encouragement and the hundreds of hours of labor provided this year to make all of these wonderful things happen.

Sincerely,
Gordon Herron
